

## EDUCATIONAL AGREEMENT

Academic Year 2026-2027

**Camplus** was born to offer today's students and tomorrow's professionals the possibility to discover their calling in a favorable environment, which is able to inspire them during the delicate phase of research and discovery. It is **an educational path created to accompany each and every student from their first day at university to their first day at work.**

This ambitious goal, in line with the activities pursued by the **Conference of the of Merit**, characterizes the *mission* of Camplus and takes shape within an educational path focused, for the academic year 2026-2027, on the theme **"People are like stained glass windows: they shine and sparkle when the sun is out, but when darkness falls, their true beauty is only revealed if a light is turned on from within."**

Spontaneous relationships, a variety of initiatives, and the constant presence of qualified personnel contribute to turning the choice to live at Camplus into a medium to long-term investment.

Daily interaction with the Management staff is key to discovering the students' aspirations and to then successfully transforming these into concrete goals. The Management will make it possible to take advantage of active support during every phase of life at Camplus, to undertake initiatives and events aimed at reinforcing the relationship between you and other students, to nurture your passions, and to create a path into the working world that informs your professional choices.

**This "educational agreement"** is the basis for an educational path that is complementary to your university studies, created on the basis of each student's personal aptitudes.

The variety of activities proposed will allow you to become well-rounded with respect to your personal potential and to your academic studies. The activities include themed workshops, complementary interdisciplinary laboratories, international exchange projects, language courses, and participation in cultural and sporting events.

For the development of its educational paths, Camplus relies on **a board of lecturers and educators** made up of professors from each location's university as well as professionals from the working world.

Moreover, Camplus has a **network of tutors** available for students to take individual or group lessons. The tutors are professors, researchers, and industry experts who guide the students in their understanding of their university subject matter, and help them to push beyond the limits of a specific course.

The Educational Agreement will be undertaken during the academic year of the student's stay at Camplus and, for the student, it consists in the duty of:

- Obtaining a **arithmetic mean** equal to or higher than the one obtained by the students enrolled at Camplus' reference university;
- Taking part in the activities included in the educational offer, guaranteeing both continuous and active **participation**;
- Submit at the end of each semester - in case of staying that last less than a year, before check out - the updated **exams university transcript**;
- Participation in at least 70hours of development during the first 3yearsof university and 25hours of development during the following years (in other words from the 4th year on for single-cycle university degrees, and from the 1st year for Master's degrees). For mobile students, the necessary participation is 25 hours. The number of hours of development that must be obtained is proportional to the length of the Agreement;
- Filling in an **assessment questionnaire** regarding the knowledge gained by participating in the educational path.

The educational proposal, ratified with the present Educational Agreement, defines a bilateral commitment between Camplus and the Student. The latter, by signing this document, agrees to respect it in its entirety.
